WELCOME TO THE START-UP BUSINESS BINDER

This introduction will inform you on the intended uses for this document. We’re glad that you’re considering your public library and its resources at the first stages of your business development.

Libraries are a natural partner to entrepreneurs and business owners. Cook Memorial Public Library District (CMPLD) offers users access to spaces, WiFi, continuing education, and research resources.

Librarians are happy to direct library patrons to subject experts and community organizations or resources when the library itself is unable to answer a question.

The following sections are based on common questions posed by new business people to the Small Business Development Center (SBDC) staff at College of Lake County in Grayslake, IL.

Similarly, the Illinois Department of Commerce and Economic Opportunity (DCEO) provides a valuable Starting Your Business in Illinois Handbook.

Scan this QR Code above to access a digital copy of this document.
Use this checklist to begin working with the Illinois Small Business Development Center and International Trade Center (SBDC-ITC) at College of Lake County and ensure your efforts to start a business are successful. Registration is the first step to accessing SBDC-ITC resources.

BASIC STARTUP RESOURCES

- Read the Starting Your Business in Illinois Handbook in English or Spanish, which provides a wide variety of information and state and federal resources for small businesses.
- Create a simple business plan using Business Model Canvas.
- Create a comprehensive business plan using the Step-by-Step Business Plan Workbook.

SBDC-ITC REGISTRATION AND RESOURCES

- Register as a client with the Small Business Development Center (SBDC) at College of Lake County.
- View the Starting Your Business in Illinois discussion to learn the basic elements of how to successfully start a business.
- Schedule a one-on-one advising session with an SBDC advisor who specializes in advising entrepreneurs on the process of starting a business.
- Join the BizHub community, that connects businesses to critical success resources, such as commercial banks, accounting, funding sources, and commercial insurance providers.
- Register for the “Training | Assessment | Development” (TAD) platform, a free tool which offers training and skill-building programs.
- Attend free and low-cost training programs to strengthen your knowledge and skills. Topics include: startup & planning, marketing & sales, accounting & finance.
- Ask your SBDC advisor about LivePlan, a business planning software tool.

BUSINESS REGISTRATION, LICENSE AND REGULATIONS

- Determine the best legal entity format for your business. Apply for a legal entity through the Illinois Secretary of State.
- Get an Employer Identification Number (EIN) to register your business and pay taxes or an Individual Taxpayer Identification Number (ITIN) if you do not have a social security number.
- Complete an Illinois Business Registration form to register as an employer with the Illinois Department of Revenue. Your local government may need your IBT number for sales tax purposes.
Consider the need for commercial liability insurance and purchase coverage if applicable.

Apply for applicable federal and state licenses and permits.

Work with the Lake County Health Department to receive training and permits for food related businesses.

Complete an Assumed Business Name Form from the Lake County Clerk’s office if you plan to be a sole proprietor.

Contact your local village hall for information about licenses, permits, parking, restrictions, signage requirements and more. Your local government may need a description of your business and an address where your business will be located. If negotiating a lease, you may need to also request a contingency for zoning approval to verify your business type is allowed in the location you selected.

BUSINESS FINANCE AND ACCOUNTING

- Calculate startup costs using Small Business Administration (SBA) resources.
- Explore funding sources.
- Establish a commercial banking account.
- Provide for accounting and tax preparation needs.
- Obtain a Sales and Use Tax Permit if applicable.

SBDC-ITC CONTACT INFORMATION

Hours: Monday - Friday, 8 am to 4:30 pm
WHY START HERE?

Prior to developing a comprehensive business plan entrepreneurs should assess the viability of the business they are considering starting - in other words, ensuring product-market fit.

Product-market fit is achieved when a product and its value proposition solve a customer problem and there is a sufficient number of customers willing to pay for it with their time or money. Typically, achieving product-market fit includes defining your target market and value proposition, creating a prototype product that includes the features required to achieve the value proposition and testing the product with a sizable enough number of the target audience to gather good data.

Business Model Canvas, sometimes called a “lean canvas,” can be helpful in answering basic startup questions in a reduced amount of time. In addition, consider testing the viability of your idea. Learn more with the articles here and here. Candid, the 501(c)(3) parent organization of Guidestar, offers a nonprofit startup assessment for prospective nonprofits.

WHAT IS THE BUSINESS MODEL LEAN CANVAS?

The business model canvas is designed to quickly and informally define a business model to determine how a business will earn money. Consider it a blueprint for a product or service in development. Several websites, such as Canvanizer, Strategyzer, Business Models Inc., and other “canvases”.

HOW CAN I CREATE A BUSINESS PLAN?

Once product-market fit is confirmed, a business plan should be created. A business plan helps to answer important questions required to ensure business success and also can help owners to decide whether the business is worth investing in before they commit financial and other resources. Many business planning resources are available, some at no cost and others for a fee.

Common business plan sections include the following. Click on a link to watch a corresponding video.

- Executive summary
- Company description
- Market analysis
- Competitive analysis
- Organizational structure
- Financial plan
- Growth strategies
- Appendix

WEB RESOURCES

- SCORE offers a business planning tool.
- View Small Business Administration (SBA) business plan templates.
- Location research questions can be directed to the SBDC-ITC.
- Look up socio-economic demographic data with the map-based U.S. Census Business Builder. Download a report and add it to your plan.
- Get socio-economic and demographic data with embeddable graphics for your business plan from DataUSA.io.
- Learn more about the languages spoken in a community from the U.S. Census with this link.

Gale Business Plan Builder – Step-by-step online planning tool for starting, managing and optimizing a business or nonprofit. Intuitive dashboard walks users through five areas of exploration to develop a business plan focused on long-term success. Try the Lean Canvas here.

Gale Business: Entrepreneurship – Find sample business plans and access the small business sourcebook.
HOW DO I CREATE AN EFFECTIVE MARKETING PLAN?

Marketing is a broad range of activities focused on compelling people to turn to you and your business for the products and services they need. It is one of the most important business activities because without effective marketing businesses have difficulty attracting and retaining customers. Businesses that don’t have customers also don’t have revenue. And businesses without revenue don’t typically stay in business for long. Social media can be a powerful resource. Do not rule it out.

A business plan and a marketing plan might have overlap. A marketing plan answers questions like:

- What problem or need does the business address?
- What specific products and/or services does the business sell?
- What makes the business different from competitors?
- Who is the target market?
- Where can people within the target market be found?
- What can be done to get their attention?
- What must be communicated to them to pique their interest?
- What pricing strategies will be used?
- How can the business keep and grow customers

SECTION SIX
COPYRIGHT, PATENTS AND TRADEMARKS

COPYRIGHT
Copyright protects written, musical, artistic, computerized and architectural works for a period of time, giving the creator a monopoly over the work for the duration of the copyright period. After this period, the work moves into the public domain, becoming available to all. Copyright is granted automatically upon creation, but registration of work(s) can be beneficial to copyright holders in case of legal disputes.

The copyright duration is typically the life of the author plus 70 years. In the case of works for hire, anonymous works, or pseudonymous work, copyright lasts 95 years from the publication date, or 120 years from the creation date, whichever happens to be shorter. For more info, checkout this Intellectual Property crash course, copyright p.1 and copyright p. 2.

Search the Library of Congress Copyright registry database.

Contact the Copyright Office:
- Phone: 202-707-3000 or toll-free 877-476-0778
- Website: https://www.copyright.gov/registration
- Email form: https://www.copyright.gov/help/index.html

PATENTS
A patent is a limited duration property right given to the creator of an invention. In exchange, the invention is publicly disclosed. In essence, the holder has a monopoly on the invention for the period of time the patent is granted. Four categories of items that can be patented include machines, chemicals, manufactured products, and industrial processes. Patent types include Utility, Design, and Plant. Learn more about patent law with this 10-minute Crash Course video.

Search the USPTO Database for Patents

Contact The United States Patent and Trademark Office (USPTO):
- Phone: 1-800-786-9199
- Email: MidwestRegion@uspto.gov
- Website: https://www.uspto.gov/about-us/contact-us

TRADEMARKS
A trademark uses words, symbols, or phrases to indicate the goods and services. A service mark is similar, except that the words, symbols or phrases identify the source of the goods or services rather than the goods or services themselves. Learn more about trademarks with this 11-minute Crash Course video. Before you apply, search the USPTO trademark database.

Trademark Centers in Illinois:
- Chicago Public Library
- Western Illinois University
WHAT TYPE OF BUSINESSES ARE THERE?

The four most common forms of business ownership are Sole Proprietorship, General Partnerships, Limited Liability Company (LLC) and Corporation (C-Corp and S-Corp). Two key considerations when selecting a legal entity are liability protection for owners and tax requirements.

Click here for a summary of each form of ownership and a list of pros and cons. There may be other considerations depending on the type of business so consider consulting a business attorney when determining the best form of ownership for your business.

The Starting Your Business in Illinois Handbook outlines various forms of business ownership and the characteristics of each.

Many new businesses start by utilizing personal cash funds or through investments from family and friends. There are options available to business owners looking to grow their business in the form of grants, business loans, and business lines of credit. This section will help you understand the importance of financing options in the pursuits of business growth, the options available, potential pitfalls, assessing risks associated with lending, and available resources to further your understanding.

When you are ready to do a break-even analysis, SCORE has a template. Or, read up on how to compute a break-even analysis at Harvard Business Review or at The Balance Small Business.

DEVELOP A PITCH DECK

A "pitch deck" is a "deck" of slides that make up a short presentation intended to pitch your business, service, or product. Check out Canva or PitchDeckExamples.com to learn more.

WHAT IS COMMERCIAL FINANCE?

Commercial finance is the term given to a huge range of business finance products that include both short and long-term solutions, offered by a provider external to the business. Commercial loans utilize business assets to secure the loan and often come from traditional banks or credit unions, the Small Business Administration and Community Development Financial Institutions (CDFIs). Other options include crowdfunding and on-line lenders. Care should be given to ensure that loan rates and terms are not overly risky for the business.

Startup businesses are unlikely to get a commercial loan because startup businesses do not usually have business assets sufficient to secure a loan. Instead, new business owners may need to use personal assets such as the value of their home, vehicles, savings accounts, etc. to secure a personal loan.

WHAT QUESTIONS SHOULD I ASK A LENDER?

Here are some questions to ask when screening commercial lenders.

- Are you an expert in my market?
- What is the average loan size you work on?
- How long does it typically take to close?
- What other loan options are available?
- What are the application fees — and how do they break down?
- Can I have a copy of my appraisal, credit report and engineer report?
- How much of my own money do I need to put down?
- How long can you lock in my interest rate?
- How much business insurance do I need?
WHAT QUESTIONS WILL LENDERS ASK ME?

- How much money do you need and what will you use it for?
- What is your credit score?
- How will you repay the loan
- Can you put up collateral and a down payment?

Click here for a great article about these questions and more.

OTHER TYPES OF FUNDING

Grants.gov
- Grants.gov is a government grants clearinghouse.
- Upcoming funding resources from the Illinois Department of Commerce and Economic Opportunity at https://dceo.illinois.gov/dceo-grants.html
- Take a look at grant information from the SBA at www.sba.gov/funding-programs/grants

ProTip💡: Have budgets and business financials prepared and ready as these opportunities open and close quickly.💡

SBA
The Small Business Administration offers a variety of commercial funding programs, and these funding programs are processed through an ever expanding list of local lenders.

Angel Investors
The primary difference between a venture capitalist and an angel investor is whose money is being invested: VCs invest capital controlled by a venture capital fund or firm, while angel investors invest their own money. Listed below are some angel investment organizations in the midwest.

- Illinois Investment Network - https://www.illinoisinvestmentnetwork.com/home
- Cornerstone Angels - http://www.cornerstoneangels.com/
- AngelList - https://angel.co/

The Illinois Department of Commerce and Economic Opportunity provides an Angel Investment Tax Credit Program to help small businesses to attract prospective angel investors.

Grants
Business grants are available from a variety of sources. Grant funding can be challenging to secure as many businesses compete for the same resources. The U.S. Chamber of Commerce provides a fairly comprehensive list of grant and loan programs.

Bootstrapping
Finance your business yourself with your savings, credit, home equity loans, help from friends and family members, or by going out and getting sales.
Crowdfunding

Crowdfunding allows business owners and people with an idea to raise funds and get capital to take their business or idea to the next level. Common platforms to use for crowdfunding campaigns include Go Fund Me, Kickstarter, Indie Go Go, and Republic.

How do I manage my business finances?

Here are some tips to help business owners manage finances and stay organized.

- Set up separate personal and business banking accounts. Commingling your personal and business funds will be a disaster come tax time. Open a business checking account and another account for short-term savings. Don’t have business transactions flow through your personal accounts and don’t have any personal transactions flowing through your business accounts. Keep both accounts separate to make accounting and bookkeeping transparent.

- Set aside money for taxes. On a monthly basis, calculate business revenue and ask an accountant or tax preparer to help you identify the amount of money you should set aside to pay federal and state taxes. This is what the short-term savings account mentioned above is for.

- Set up a filing system. Whether using paper or a digital filing system, here are some of the items you should keep:
  - Accounting and bookkeeping records
  - Bank statements
  - Contracts
  - Invoices
  - Permits & licenses
  - Vendor records
  - Tax papers

- Use an accounting program. Using a free or low-cost accounting program can save time and, ultimately, money. QuickBooks, Wave, Zoho Books, Xero, and FreshBooks are a few examples of the best apps for small business owners.

WHAT DO I NEED TO KNOW TO HIRE AND RETAIN GOOD WORKERS?

Recruiting good quality employees is one of the biggest challenges for small businesses. The marketplace for talent is tight and more and more businesses are offering higher pay, sign-on bonuses and a variety of other employment benefits to remain competitive.

There are a variety of laws that employers need to comply with such as wages and hours, safety and health, worker’s compensation and more. Businesses also must create innovative approaches to retaining the employees they worked so hard to hire. In addition to adequate compensation, employers often offer additional benefits such as mentorship programs, health and wellness offerings, training and development, recognition and reward programs and more.

HOW DO I REPORT AND PAY TAXES?

The Internal Revenue Service (IRS) is the federal agency that oversees business tax reporting and filing. Similarly, the Illinois Department of Revenue (ILDOR) oversees business tax activities for the state of Illinois. Generally, federal taxes include income taxes, self-employment taxes, which includes Social Security and Medicare, employment taxes for businesses with employees and excise taxes, which apply to certain types of products or services. Illinois state taxes generally include income taxes, sales taxes, and payroll taxes. Certain types of businesses also need to pay replacement taxes, which are intended to replace money local governments lost when they no longer had the power to impose their own personal property taxes. This replacement tax is collected by Illinois but then paid out to local governments.

A good approach to learning about tax requirements and ensuring compliance with tax laws is to contact local representatives for the IRS and ILDOR. Taxpayer assistance hotlines are available through both agencies, which can be accessed by clicking the links listed under Web Resources below.

There are two important forms to complete for tax reporting and payment in the state of Illinois.

- Get an Employer Identification Number (EIN) to register your business and pay taxes or an Individual Taxpayer Identification Number (ITIN) if you do not have a social security number.
- Complete an Illinois Business Registration form to register as an employer with the Illinois Department of Revenue.

WEB RESOURCES

- Small Business Development Center (SBDC) advising and training resources.

PRINT BOOKS FROM CMPLD. CLICK ON COVER TO PLACE HOLD
All of Cook Memorial Public Library District’s (CMPLD) research resources can be found at cooklib.org/research.

Most library research resources are available at the physical library locations without a library card. You will need your valid CMPLD library card number to use the library’s databases and online resources outside the library. These include: Gale Business: Entrepreneurship, S&P Net Advantage, Business Insights: Global, the Legal Forms database, the Public Records database, among others. If your library card is not working, please call the library and ask for the Reference Desk at 847-362-2330.

Follow the instructions in the image below to get started with the Linkedin Learning app. You will need your full library card number and password/pin. Or, login at linkedin.com/learning-login/go/cmpld.

Browse the Gale Courses class catalog here. Choose a class start date and create your Gale Courses account. Log back in on your class start date to participate and engage with the course.
See the image below to sign up for an account with **Gale Business Plan Builder**. Then, Gale Business Plan Builder will ask for information about your company. Most information is optional. However, you will be required to give your business a name and pick a company type (LLC, partnership, sole proprietorship, etc.). You may need your full library card number if accessing Gale Business Plan Builder for the first time from home.

For information on getting started with **Hoopla**, please visit [cooklib.org/elibrary/hoopla-instructions/](http://cooklib.org/elibrary/hoopla-instructions/) or call the library at 847-362-2330.

The library has laptops, hotspots, and other **equipment** for checkout. [Click here for the full list.](#)
CMPLD offers study rooms at both library locations: Cook Park Library in Libertyville and Aspen Drive Library in Vernon Hills. Each location also offers larger meeting spaces which are available to outside groups when not in use by the Library. Learn more at cooklib.org/services/room-reservations.
B**i**zHub is a Lake County Illinois business-to-business resource and contains a variety of commercial funding options as well as many other types of resources.

The CIC Business Incubator in Lake Forest provides local entrepreneurs and business owners with access to expert mentors, a structured mentoring process and a physical location to build the confidence and expertise to succeed and grow.

The Lake County Tech Hub is a local business incubator in Waukegan. Hub stands for “helping understand business”. Their mission is to support aspiring entrepreneurs, students, small businesses, and adults in career transitions.

The Northern Illinois Chapter of Business Networking International (BNI) is a membership-based networking and referral organization supporting the growth of businesses, big and small.

The Job Center of Lake County Partners with business and community organizations to support job seekers and foster career skill growth in Lake County.

Lake County Partners is an economic development organization in Lake County, IL “built for business” that partners with local governments.

The Women’s Business Development Center in Chicago, IL uses local and national advocacy, educational programs, and services to promote the self-sufficiency of women entrepreneurs.
